

Dear Fellow Citizens,

Please do not destroy the beauty of Nantucket Sound by handing it over to a private company who will turn it into a wind farm. I've seen the wind farms in California and I can not think of anything more ugly. I regularly sail on Nantucket Sound and am horrified that anyone would propose such an outrageous misuse of public property. I might see it if we were in some desperate need of electricity or oil. As you can see by the size of vehicles people are driving, that is hardly the case.

Sincerely,

Sheridan Carey, 106 Skyline Drive, Westwood, MA 02090, cencar84@aol.com
